

## Contact Lens Evaluation Service Policy

**Please initial below and sign if you would also like a contact lens evaluation during your visit today.**

Contacts are elective medical devices. This may mean that insurance considers contact lens evaluations to be **a separate, elective charge to be paid by the patient**. These charges include the initial examination, trials, and any follow ups needed, even if the contacts are the same brand and power as previously worn. \_\_\_\_\_

Follow ups, if considered necessary by the doctor, are **required**. \_\_\_\_\_

Contact lens evaluations must be initiated within 60 days of the initial comprehensive exam, otherwise a new comprehensive exam is required. \_\_\_\_\_

The wearer has 60 days to follow up in order for a final prescription to be released. After 60 days without a follow up the wearer is responsible for the cost of a full comprehensive examination and contact lens evaluation. \_\_\_\_\_

After a prescription is finalized, should a situation occur where the prescription has changed, the fit is no longer acceptable to the wearer, or any additional changes in preference occur, the wearer is responsible for a full contact lens evaluation at complete retail cost within six months of the exam. Beyond six months, a comprehensive exam must also be completed. \_\_\_\_\_

Additional trials are dispensed at the doctor's discretion. Trials will not be provided in lieu of purchasing boxes, or for temporary use without an examination. It is the wearer's responsibility to purchase an adequate amount of lenses for their intended use. \_\_\_\_\_

## Contact Lens Care Agreement

- Dispose of your contacts with a regular wear schedule as prescribed by your doctor.
- When using solution or contact lens cases use fresh solution, replaced daily.
- Do not top off solution in cases.
- Leave contact lens cases open to dry, and close tightly when filled.
- Do not use any other solutions for storing contacts other than contact lens specific and modality safe solution.
- Water is not an acceptable substitute for solution.
- Should the contact lens(es) become dirty, or come in contact with an unclean surface, rinse thoroughly with solution by filling the palm of your hand with solution and gently rubbing back and forth with a clean finger tip.
- Do not sleep in contacts, or allow contacts to come in contact with water.
- If irritation, itchiness, redness, discharge, or discomfort occurs, discontinue use of contact lenses and notify us immediately.

I have read and agree to the above
